VERSE 1

Has everything you've counted on

Left you right here with no warning

Have your dreams become invisible

Wait with me dear till the morning

Light will make the night burnout

CHORUS

Hold on - daylight is coming

Daylight is coming to break the dawn

Daylight is coming

VERSE 2

The brightest stars are falling down

Is hope lost in the black skies

The darkness must precede the dawn

Hold on till the sunrise

Light will make your night fade out
